FULL STACK DEVELOPER

About Me

I'm a recent graduate of General Assembly's Web Development Immersive course with a background in engineering. I love to solve problems and my main objective is to learn as much about coding as I can, to become an awesome developer. I'm currently looking for an opportunity that would allow me to work alongside experienced developers and help me gain experience in solving problems in a creative and effective manner.

Past Experience

Jul 2016 – Oct 2016

Web Development Immersive - Student

[General Assembly](#)

- Three month long full-time web development immersive course structured to enable individuals seeking a career change in the field of software development.
- Intensive learning of web development skills such as HTML/CSS, JavaScript, RoR, Backbone.js, jQuery, AJAX, PostgreSQL.

Mar 2015 – Jan 2016

Sales Engineer

[Koyo Australia Pty. Ltd.](#)

- Reporting to sales manager
- Inventory management - forecasting, procurement and delivery to customers.
- Provide technical assistance to customers and internal staff.
- Investigate bearing failure analysis in the inspection room provided.
- Make technical reports and work procedures for customers to increase sales.
- Use of internal software (AS400).

Jun 2008 – Jul 2013

Engineering Officer

[Navy](#)

- Troubleshooting breakdown maintenance of equipment on board the ships.
- Technical documentation, reporting and management of defective material.
- Inventory and Stock management.
- Technical risk assessment.
- Cost estimations.
- Supervise various service technicians and other engineers in maintenance.
- Training and mentoring new and younger crew members.
